- SharePoint Online & On-Premises
- **Microsoft 365 Ecosystem** (Teams, OneDrive, Outlook, Planner)
- **Advanced Search Solutions** (Metadata, Content Types, Search Schema, AI-powered Search)
- **Power Platform Integration** (Power Apps, Power Automate)
- **Information Architecture** (Site Collections, Libraries, Permissions, Metadata)
- **Document Migration & Cleanup** (Data Auditing, Redundancy Elimination)
- **User Experience (UX) Design** in Microsoft Environments
- **Process Automation** (Power Automate)
- **Governance & Compliance**

PROFESSIONAL EXPERIENCE

Dynamics CRM & SharePoint Administrator

Access ARM Pensions | Abuja, Nigeria | 2019 – Present

- Designed and implemented a **SharePoint intranet from scratch**, enabling document management and collaboration for **700–1,000 staff** across multiple departments.
- Built and deployed a Power Virtual Agents chatbot to handle internal employee queries around HR.
- Conducted **full audits** of SharePoint environments to eliminate redundant data, reorganize libraries, and enhance navigation for **non-technical users**.
- Built a **Power Apps UI** to automate document uploads into SharePoint, dynamically routing files to specific folders based on conditional logic.
- Led a **record-time migration** of **10 terabytes** of documents from local servers to SharePoint Online, ensuring **zero data loss** and full compliance.
- Created **department-specific SharePoint sites** to manage permissions, improve collaboration, and enforce document governance policies.

- Developed **advanced search solutions** leveraging metadata, content types, and custom search configurations to significantly improve document findability.
- Integrated **Power Automate flows** to streamline processes such as document approvals, notifications, and scheduled reporting.

KEY PROJECTS

Education

Enterprise SharePoint Cleanup & Optimization

- Audited a multi-year SharePoint environment, removing outdated files and redundant structures.
- Implemented improved metadata tagging and folder hierarchy for easier navigation.
- Delivered a **50% reduction** in search time for common documents.

AI-Enhanced Search Prototype *(Proof of Concept)*

- Tested integration of **Microsoft Search with AI capabilities** for contextual recommendations.
- Designed a UX flow for predictive document suggestions based on user behavior.

TOOLS & TECHNOLOGIES

SharePoint Online, Microsoft 365, Power Apps, Power Automate, Teams, OneDrive, Planner, Microsoft Search, Azure AD, Excel, Visio, Power BI, PowerShell.
