Project

[Mortgage Application manager (V1)]

Prepared by

Nuhu Audu

Name : **Grace Chituru**

Unit: Orchestration & Strategy

Date: 17th October, 2024

1. Overview

This document confirms the completion of User Acceptance Testing (UAT) for the Mortgage Application Digital Platform developed for Access ARM Pensions.

The platform is a web-based digital system designed to streamline the mortgage document submission and review process for RSA holders (clients), Mortgage Lenders (PMIs), and Pension Fund Administrators (PFAs). It separates the New Application Phase and the Post-Approval Phase, reducing document errors, enabling faster processing, and ensuring transparency in application tracking.

The purpose of this sign-off is to validate that all User Interface (UI), Data Input, and Admin functionalities meet agreed business and functional requirements, and that the solution is ready for production deployment.

2. Scope of UAT

UAT covered the following modules and features:

A. USER MANAGEMENT

Test ID	Test Scenario	Expected result	Result(Pass/Fail)
UM-001	Create new user with all required fields	User created successfully, appears in user list	
UM-002	Generate temporary password	Random secure password generated and displayable	
UM-003	Toggle password visibility	Filter by stage or missing documents	
UM-004	Create CLIENT user and assign PMI company	User created with correct PMI assignment	
UM-005	Create Reviewer user (no PMI required)	User created without PMI company requirement	
UM-006	Delete user	Confirmation modal appears, user deleted successfully	
UM-007	View user statistics	Correct counts for total, active, first login, super admins	

B. PMI COMPANY MANAGEMENT MODULE

Test ID	Test Scenario	Expected result	Result(Pass/Fail)
PMI-001	Create new PMI company	Company created successfully	
PMI-002	Edit existing PMI company	Company details updated correctly	
PMI-003	Set PMI status to Active	Status updated, reflected in UI	
PMI-004	Set PMI status to Suspended	Status updated, reflected in UI	
PMI-005	Search PMI companies	Search results match query	

C. APPLICATION MANAGEMENT MODULE

Test ID	Test Scenario	Expected result	Result(Pass/Fail)
APP-001	View all applications list	All applications displayed correctly	
APP-002	View application statistics	Correct counts for all statuses	
APP-003	Search applications by Search applications by borrower name/RSAPIN/ID	Matching applications displayed	
APP-004	View application details modal	Modal opens with complete information	
PMI-005	View borrower information in details	All borrower fields displayed correctly	
APP-006	View application documents in details	Documents list loaded and displayed	
APP-007	Download document from details modal	Document downloads successfully	
APP-008	Update status to "Approved"	Status updated successfully	
APP-009	Update status to "Rejected" with reason	Status updated, rejection reason saved	
APP-010	View processing time calculation	Days since submission calculated correctly	

D. DOCUMENT MANAGEMENT MODULE

Test ID	Test Scenario	Expected result	Result(Pass/Fail)
DOC-001	Upload PDF document	Document uploaded successfully	
DOC-002	Attempt to upload non-PDF file	Error message displayed, upload prevented	
DOC-003	Delete document with confirmation	Confirmation modal appears	

E. CLIENT DASHBOARD MODULE

Test ID	Test Scenario	Expected result	Result(Pass/Fail)
CD-001	Client Login (First Time)	Forced request for Password change from Temporary password	
CD-002	Client Login	Login Successful, with the new password	
CD-003	View dashboard welcome message	User name displayed correctly	
CD-004	View total applications statistic	Correct count displayed	
CD-005	View under review applications	Correct count (pending + submitted)	
CD-006	View approved applications count	Correct count displayed	
CD-007	View needs action count	Correct count (returned + rejected)	

CD-008	View recent applications (last 3)	Correct applications displayed	
CD-009	View system notifications	Relevant notifications displayed	
CD-010	View application status badges	Correct colors and labels for each status	
CD-011	Create new application	Application, created and document uploaded successfully	

Signoff Sheet

UAT Sign off signifies the approval to kick-start the go-live process.

I confirm that the system meets the business requirements and approve the system for production deployment. ☐
